Poznań University of Life Sciences takes a leading position in rankings of universities of life sciences and biological sciences in Poland. At present we have 12,000 students, and 1,500 employees. Our eight Faculties offer a wide scope of education within 22 fields of study and over 30 specialisations, including Biology, Biotechnology, Landscape Architecture, Agriculture, Horticulture, Forestry, Wood Technology, Environmental Protection, Animal Science, Food Technology, etc. Over 80 thousand graduates working in numerous locations worldwide, hundreds of doctoral and post-doctoral students have received their degrees in numerous scientific centers in Europe and the other continents.

Faculties of:

- Agronomy and Bioengineering
- Forestry
- Animal Breeding and Biology
- Wood Technology
- Horticulture and Landscape Architecture
- Food Science and Nutrition
- Land Reclamation and Environmental Engineering
- Economics and Social Sciences

Study offer in English:

- MSc in Food Science and Nutrition
- MSc in Plant Breeding, Seed Science and Technology
- MSc in Forestry
MSc in Food Science and Nutrition

Candidates for MSc studies must hold Bachelor of Science degree in any of the following subjects: Food Science & Technology; Chemistry or Applied Chemistry; Chemical, Biochemical or Agricultural Engineering; Biotechnology; Agriculture; Human Nutrition and Biochemistry. The basic science training is expected in at least two of the following fields: mathematics, chemistry and biochemistry, biology and microbiology.

Each application will be evaluated by the Educational Committee for admission and the personal interview with the applicant might be necessary.

MSc in Plant Breeding, Seed Science and Technology

The MSc programme is geared for holders of BSc degree in Horticulture, Agriculture, Agricultural Engineering or Agricultural Biotechnology. During the studies, students will gain knowledge on plant breeding, molecular biology, seed production and processing of vegetables and flowers, methods of seed quality testing, seed marketing and company management. The course includes selecting your MSc research project following the student’s individual interests, and more than 10 visits and study tours in seed companies in Poland, France and Italy (paid additionally by students). The studies carried out since 1996 and resulted in almost 90 graduates, of which 6 had continued their career in PhD studies.

MSc in Forestry

The MSc programme is geared for holders of BSc in Forestry or in related sciences. After completing the courses, presenting the master’s thesis and passing the final examinations, the student receives the degree of M.Sc. in Forestry. During their studies, students are offered lectures, classes, labs and field trips/classes. Apart from obligatory courses students may select from a number of electives, covering the whole spectrum of modern forestry issues. The programme is very rich and versatile, offering a good insight into European forestry. It can be an important step in your professional development.

Excellent chance to develop your career and visit Europe

Each course lasts for 3 semesters, starting in October and costs EUR 1200 - 1800 per semester, including accommodation in a dormitory (with access to cooking facilities).

Applicants are expected to speak English well enough to make oral presentations and participate actively in the courses and use internet to search for relevant information.
