Poznań University of Life Sciences

Invites to a lecture of

dr Grzegorz Sumara

Signaling Cascades in Metabolic Diseases

Wednesday, 24th November, 13.30

Scientific bio

MSc in Biology (UJ Kraków); PhD (ETH Zurich); 2009-2012 postdoc - fellowship Human Frontier Science Program (HFSP) at Columbia University Medical Center, New York; 2013-20 - group leader at University of Würzburg, Germany (Rudolf Virchow Zentrum (RVZ)); 2016 - recipient of ERC starting Grant (SiCMetabol); since 2018 – head of the Dioscuri Center of Scientific Excellence at Nencki Institute of Polish Academy of Sciences in Warsaw.

Currently investigates the impact of conventional and non-canonical signalling cascades on the regulation of adipocyte function and development of metabolic diseases such as obesity, type 2 diabetes as well as cancer associated cachexia. More on:
